Customer refund process

Harbor Supply back office, operations team. Version 3, March 2026.

Use this process for every customer refund. A refund cannot be reversed once it is confirmed.

1	**Open Orders** Open Orders from the left menu of the back office.
2	**Find the order** Type the order number in the search box and press Search.
3	**Check the status** Open the order. Only refund orders whose status is Delivered.
4	**Check stock** Click Check stock. The returned item must be back in stock before any refund is paid.
5	**Choose a reason** Choose a refund reason: Damaged on arrival, Wrong item sent, or Customer changed mind.
6	**Issue the refund** Click Issue refund. Type the order number again in the confirmation dialog.
7	**Supervisor approval** Refunds above $200 need a supervisor code. Ask a supervisor to type their code in the confirmation dialog.
8	**Confirm** Click Confirm refund and wait for the green confirmation message.

Out of stock items

If Check stock shows Out of stock, do not refund. Ask the warehouse team to receive the returned item first.

Simulated scenario for the Kohu demo. Harbor Supply is not a real company; this document belongs to the simulated back office app in corpus/demo-app.
